

WORLDWIDE PRESENCE. LOCAL ATTENTION.

Your Partner for Automated Production Solutions

Excellence

Get to Know NES Worldwide

NES Worldwide has been a leader in automated lithographic plate handling solutions for more than fifteen years. Our highly experienced, hands-on team consistently delivers automated production systems that are designed to increase reliability, throughput and productivity – giving you confidence and a competitive edge.

With locations in the U.S and Europe, NES Worldwide provides rapid response, customized solutions and expert support.

With locations in North America and Europe, NES Worldwide offers a unique combination of worldwide presence and local attention. Customers around the world can select from a broad portfolio of superior products, and have ready access to an NES specialist whose primary focus is to keep your businesses running smoothly.

Whether you seek new or refurbished equipment, simple or complex systems, you'll find that we're honest, knowledgeable, easy to work with, and dedicated to delivering products and services that will meet your specific requirements. And, we complement our exceptional equipment offering with world class support, so it's easy to see why NES Worldwide is your ideal partner for automated production solutions.

A Complete Solution

- High performance plate processors
- Quality refurbished systems
- Essential plate handling support equipment
- Expert engineering services
- Reliable parts and consumables
- Personalized service and support

High Performance Plate Processing Equipment

If you're looking for a local supplier that can deliver tested, high performance plate handling systems – quickly and at a price that's highly economical – NES Worldwide has a full line of products to suit your needs.

From compact, self-contained conventional plate processors to large format, on-line CTP plate processors, NES Worldwide not only offers new plate processing systems, but also the essential

New Equipment

- Computer-to-plate processors
- Thermal, violet or photopolymer
- Conventional processors
- Negative developer units
- Multi-stage positive/ negative processors
- Support equipment
- Rinse gum units
- Plate recovery units
- Plate stackers
- Water recirculation systems
- Chillers
- Parts, consumables and service

Quality

support equipment – rinse gum units, plate recovery units, plate stackers, water recirculation systems and chillers – to keep your plate production environment running at optimum capacity and reliability.

But we don't stop there. We help you pull it all together, with experts who have years of experience in systems engineering, workflow and maintenance. We offer invaluable installation and service advice, and can help you anticipate and schedule maintenance requirements. And when a replacement part is needed, our extensive inventories – on two continents – ensure a rapid response, for maximum system performance and minimum downtime.

We're exceedingly confident in our products and services, and you will be, too. The complete NES Worldwide product line is tested and comes with a warranty – and a very attractive price.

NES Worldwide has recently moved into a modern 40,000 sq. ft. production and warehousing facility which provides increased capacity for the most demanding schedules and production requirements.

Quality Refurbished Equipment

For maximum value, proven technology and unmatched reliability, the NES Worldwide line of refurbished products is a solid business investment.

We refurbish top-of-the-line plate-handling systems from all the major manufacturers, increasing your capacity and productivity—not your expenses. Our plate processors and stackers undergo a thorough restoration process that often improves the product's original functionality. NES Worldwide plate-handling experts look for and correct design weaknesses, so your refurbished system will deliver new levels of throughput and efficiency.

Refurbished Equipment

- Reliable plate processors
- Fully-automated plate stackers
- Dependable plate ovens

With locations in North America and Europe, we're able to deliver all of our refurbished products with expediency and a full warranty. You can also count on the local experts at NES Worldwide for knowledgeable installation and maintenance advice.

Expert Engineering Services

The highly skilled electromechanical team at NES Worldwide boasts a broad range of engineering expertise that can be applied to manufacturing challenges – and opportunities – of any size.

Experience

With extensive knowledge of industrial automation, systems integration and programming, water and waste management, control panels and engineering, our team will help you evaluate, design, manufacture and install systems that will raise your operation to maximum efficiency. You'll be better positioned to produce higher quality products, while saving valuable time, materials and resources.

Engineering Services

- End-to-end industrial automation services
- Analysis, design, manufacture, finishing, installation
- Systems integration and programming
- Evaluation of operational efficiencies
- With real-time feedback systems
- Control system for environmental monitoring applications
- System prototype design and manufacturing
- Custom fabrication
- Product refurbishing and enhancement
